

A Single Source Solution Provider for All Your SD-WAN Service

Software Defined WAN

SD-WAN is becoming the mainstream choice for many organizations. Does using Internet facing circuits instead of private circuits sound intimidating? It doesn't have to. **Integrated Telecom Solution Sourcing Inc. (ITSS)** partners with the world's leading SD-WAN providers, and can address concerns about security, redundancy, quality of experience, and more.

Your business requires a robust communications and data network for its mission critical applications and services. Traditionally that has been accomplished by connecting private sites with MPLS or other private circuits. SD-WAN provides solutions that not only meet or exceed those offered by traditional WAN technologies, but can provide additional capabilities, such as redundancy, application acceleration, dynamic bandwidth to large cloud providers, and more. Map and scale to your business objectives faster and more effectively, with SD-WAN.

WHY CHOOSE SD-WAN? SD-WAN Provides Your Business

- ✓ Best overall value and functionality
- ✓ Agility and speed when adding locations
- ✓ Redundancy, scalability and fault tolerance
- ✓ Quality of experience for critical applications
- ✓ Simplification of operations
- ✓ Connectivity to other cloud-based solutions
- ✓ Dynamic bandwidth
- ✓ Cost effective upgrades
- ✓ Support whenever you need it
- ✓ Application acceleration and optimization

WHY WORK WITH US? As your solutions Partner, Integrated Telecom Solution Sourcing (ITSS)

- ✓ Is independent & can deliver multiple options
- ✓ Will learn your business structure and goals
- ✓ Will understand your IT infrastructure
- ✓ Will determine the optimal SD-WAN solution
- ✓ Will research to source the optimal supplier
- ✓ Will implement and support the selected solution
- ✓ Stay on to handle all customer service and escalations
- ✓ Become an integrated part of your organization's ecosystem

BANDWIDTH AGGREGATION

SD-WAN allows companies to utilize multiple Internet circuits, balance the load across them, and deliver a solid quality of experience. Aggregating the Internet circuits allows for large amounts of bandwidth, while securely connecting to additional private locations. Additional sites can be added in very short order once Internet access is acquired. What's not to like—fast deployment, redundancy, secure connections, and solid quality of experience?

SECURITY

Businesses appreciate the cost associated with Internet circuits, but worry about security if transmitting sensitive data. SD-WAN provides secure connections between sites and reduced complexities – a benefit of as-a-Service solutions!

QUALITY OF EXPERIENCE

SD-WAN solutions can provide prioritization to the mission critical applications your business demands. Typically, providers choose the best circuit based on real-time statistics giving priority to video, voice, and other business applications. SD-WAN solutions optimize the traffic, reducing overall latency, jitter and response times, and accelerate the applications themselves.

DYNAMIC BANDWIDTH

Do you utilize or plan to utilize other cloud services, such as AWS, Azure or Google? Many SD-WAN providers connect directly to many of these cloud providers. Also, there are options that allow bandwidth to grow dynamically as your cloud needs change.

NETWORK FUNCTION VIRTUALIZATION (NFV)

We can also provide partnerships with companies that can virtualize out many network functions, such as firewalls, VPNs, load balancing, application acceleration, etc.

REDUNDANCY

SD-WAN solutions can combine your MPLS and Internet connections, so they don't sit idle.

ABOUT US

With over 100 years of combined IT and Telecom experience serving the Canadian Telecom market, the ITSS team brings the trust and integrity you need in your telecom advisor.

ITSS continuously analyzes and researches all available vendors and technology so you never have to worry about having the right solution that will meet your evolving business requirements.

Since its conception in 2009, ITSS has worked tirelessly to bring optimized solutions and competitive alternatives to its channel partners and its B2B customers.
