

Simplifying Complexity

Telecom infrastructures can be very complex. Due to the diversity of the Canadian landscape and a whole suite of constantly changing technologies, things get complicated quickly. As your trusted advisor, Integrated Telecom Solution Sourcing (ITSS) makes it easier for you to focus on your core business by simplifying your telecom services for you. No matter how many networks you need to power your business, you only ever have to deal with ITSS.

Trusted Advisor For All Your Telecom Needs

The telecommunications landscape can be confusing, time consuming and unnecessarily expensive for IT managers who don't speak the telecom language. ITSS is a fast-growing communications technology service distributor (Master Agent) in Canada. ITSS acts on behalf of both channel partners (VARs, Agents, MSPs) and businesses, to analyze and research all available vendor/technology options and to meet evolving business telecom requirements.

BRINGING INNOVATION TO YOU

ITSS will...

- help you harness the power of emerging technologies for optimizing your network, so you can keep your business ahead of the curve.
- continuously analyze and research all available vendors and technology options from our global providers.
- will understand your IT infrastructure.
- allow you to focus on your business and rest assured that we have the proven expertise and experience you need to manage your business communications infrastructure.

GET MORE SPEND LESS

ITSS will...

- tell you the truth. All carriers are not created equal. We'll let you know the best options at the best prices.
- support you, long after the carrier sales person has moved on.
- be invested in your long-term success, not a quick sale.
- integrate multiple services from multiple providers, multiple points of contact for service and support spread over multiple locations and source a simple solution for your business.
- stay on to handle all customer service and escalations.

“Business communications and carrier services are no longer just a ‘required’ cost of doing business. In today’s landscape, optimal communications services are a competitive advantage.”

ABOUT US

With over 100 years of combined IT and Telecom experience serving the Canadian Telecom market, the ITSS team brings the trust and integrity you need in your telecom advisor.

ITSS continuously analyzes and researches all available vendors and technology so you never have to worry about having the right solution that will meet your evolving business requirements.

Since its conception in 2009, ITSS has worked tirelessly to bring optimized solutions and competitive alternatives to its channel partners and its B2B customers.

CONNECTIVITY SOLUTIONS (SD-WAN)

Get the speed and dependability your business needs while maintaining low cost & configuration simplicity. At ITSS, we can stitch together pieces of North America’s highest performing networks to ensure high bandwidth availability, low redundancy and minimal interruptions so your business keeps running smoothly.

SD-WAN (Software Defined Wide Area Network) solutions from ITSS, aggregates diverse connection types (Fiber, DSL, COAX, Fixed Wireless, LTE, MPLS etc.)—into a single, virtual WAN that intelligently routes traffic based on bandwidth availability and real-time quality of the network paths.

SIP TRUNKING

SIP Trunking allows businesses to reap VoIP-like benefits with legacy systems, without investing in new infrastructure. SIP has very disruptive pricing models that can drive significant savings to your bottom line while extending the useful life of your premise-based hardware.

HOSTED PBX

Effectively manage your resources across all your locations, provide a consistent user experience for mobile and remote users and significantly lower your upfront investment and ongoing maintenance costs with hosted PBX solutions that deliver superior voice quality and reliability. With ITSS’s Hosted PBX (Cloud PBX) create a single point of control for your entire telecommunication infrastructure and eliminate failure points.

LEGACY VOICE

ITSS’s PRI solution provide reliable connections right across North America addressing PRI and standard business phone line and service requirements with a range of current carrier offerings at extremely competitive pricing.

CLOUD SOLUTIONS

Hackers, cyber-terrorists, natural disasters and manmade disasters are no match for the Cloud. Consolidate your hardware infrastructure or become completely hardware independent with a virtual disaster recovery and business continuity solution.
